

A
Hug and a Kiss
I
do miss. ♥xo♥

A grandma's short story explaining the
pandemic to her grandchildren. ♥

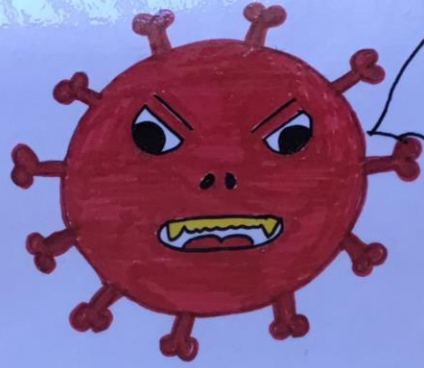

I am Coronavirus!

I hate soap
and water.

I Love to travel
all around the
world.

I like to
make people
sick.

Please wash your
hands.

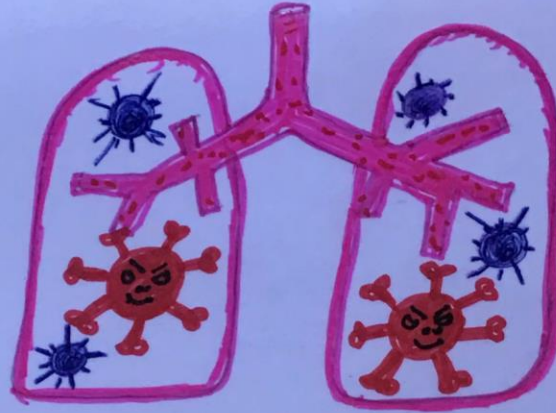

Coughing
Spreads the
virus.

Sneezing
Spreads the
virus.

Our lungs are
inside our body
they help us
breathe.

The virus makes it
difficult to breathe.

Our parks are
closed.

Our nursery, schools
and colleges are all
closed.

14
The virus is so small we
can not see it 
If its on our hands we
would not know. If we
touch our face or put
our hands in our mouth.

↳   that

will be how the virus gets
into our body and can
make us sick.

It's important to wash your hands.

stop picking your nose.

stop putting your hands in your mouth

Don't be scared if you see
People in masks.

You might see people
wearing masks. They may
have been sick and don't
want to spread the virus.

We have to stay away from
our family. We can't have
Sleepovers or play at
our grandma & grandads
house. Once the virus
goes away we can.

No kisses or cuddles
at the moment. XOXO

Life is very different just now. We have all been asked to stay at home. Save lives!

The less people around the more likely the virus will go away. You will hear a lot about the **NHS** this is the National Health Service (hospitals doctors etc) People who help us.

st
ed
!
We are all making rainbows
for our windows and clapping
for all the nurses, doctors, cleaners
truck drivers, shop workers everyone
who is helping. Life will get
better and we will all be
back together soon. I love
you all to the moon & back.
